## SRKK AI anticipates strong take-up of proprietary AI-enabled solutions

- OnePrism suite introduces Artificial Intelligence (AI)-powered Environmental, Social and Governance (ESG) monitoring, human resource on-boarding and revenue maximisation
- Software-as-a-Service (SaaS) model is intended to contribute to its recurring income proportion upon commercialisation

Rahima Ibrahim, SRKK AI Chief Commercial Officer Ms. Yew Peng Fong, together with attendees at the TRANSFORM 2027 conference today*

**Kuala Lumpur, Malaysia, 13 October 2026** – Technology company SRKK AI Berhad (SRKK AI) is optimistic of strong take-up of its suite of proprietary AI-powered solutions OnePrism, targeting commercialisation as early as the financial year ending 31 December 2027 (FY2027).

Unveiled at SRKK AI's flagship TRANSFORM conference today, the OnePrism suite of solutions currently includes AI-powered monitoring of ESG indicators, human resource onboarding, and revenue maximisation.

SRKK AI Chief Executive Officer Yew Lip Sin said, “Our past solution development experience certainly serves us well. It has formed the base for us, allowing SRKK to scale from single-client customisation to tap into multiple-corporation opportunities for common business challenges.

Moreover, these solutions have continued to undergo rigorous testing and refinement – with SRKK AI as Customer Zero, hence enhancing real-world applicability that affirms market-readiness and responsiveness.”

SRKK is actively engaging with potential customers, including Government-linked corporations, large enterprises, and small-medium business, to showcase and potentially adopt OnePrism solutions.

“Our goal since inception is unchanged: to enable every organisation to harness best-in-class advanced technologies to exponentially upskill and upscale their businesses.

As our OnePrism solution suite expands and is incrementally deployed, SRKK AI reaps multiple benefits: we gradually gravitate towards a favourable product mix, while our SaaS model is intended to contribute to our recurring income proportion. We are confident that the rollout of OnePrism will stamp our mark as a leading AI-enabled player, not just for Malaysia-based corporations, but across the South East Asian region,” concluded Yew.

The development of OnePrism solutions will be partially funded by proceeds from SRKK AI’s recent Initial Public Offering on the ACE Market of Bursa Malaysia Securities Berhad. Through the Initial Public Offering, SRKK raised RM20.48 million funds, of which RM1.32 million was earmarked for developing own data analytics and business intelligence solutions, as part of SRKK’s strategic AI initiatives.

Speaking at the event, Ir. Wan Murdani Wan Mohamad, Vice President, Digital Adoption of Malaysian Digital Economy Corporation (MDEC) reiterated MDEC’s ambition to build an economy where AI strengthens industries, improves services, creates high-value jobs and enables Malaysian companies to compete globally.

Commending SRKK AI in his speech, Ir. Wan Murdani said, “It is encouraging to see a homegrown company build capabilities alongside world-class partners, attain all six Microsoft Solutions Partner designations, expand its regional ambition, and introduce OnePrism as an AI-enabled solutions suite for smarter operations and decision-making.”

Ir. Wan Murdani also touched on Malaysia Digital 2030, which is Malaysia’s action plan to accelerate AI adoption across government, industry and society, while supporting the development, commercialisation and scaling of Malaysian innovation.

As of the second quarter of 2026, more than 7,000 companies - including several companies within the SRKK Group - had been awarded Malaysia Digital (MD) Status, with over 4,400 active companies operating across areas such as AI information technology, global business services, data centres, cloud and digital creative content.

The fifth iteration of TRANSFORM conference attracted more than 1,000 attendees across public and private sector corporations, as well as small-medium businesses. Held in partnership with Microsoft, the conference also headlined technology partners including Adobe, HP, and Sangfor.

SRKK AI is one of the Managed Partners of Microsoft, and the first Malaysian solution provider to earn all 6 Microsoft Solution Partner designations under the Microsoft AI Cloud Partner Program.
